BUSINESS STUDENT. RESEARCHER. BUILDER.

Dongfang Wang

Research, Software & Community

I study business, build tools for reading and mathematical notes, and use research and audience data to guide decisions.

EDUCATION & DIRECTION

Lone Star College-Tomball

Associate of Arts, Field of Study in Business | Expected May 2027

I am interested in how careful research and data can lead to better business decisions. My work moves between economic analysis, historical sources, performance, and software, with a continuing focus on evidence, context, and clear communication.

INSIDE THIS PORTFOLIO

02-03	Independent software
04-06	Honors research & GCIC presentation
07-09	Campus leadership, speaking & creative work
10	Channel, market & traffic analysis
11	Scholarships & academic communities
12	Skills & selected credential
13	Interests, contact & further reading

01 / INDEPENDENT SOFTWARE

Tools with purpose.

Evidence Lens

Published Chrome extension | Version 1.0.0 | Updated August 2026

Official Chrome Web Store preview - illustrative example article.

Evidence Lens makes the evidence behind a webpage easier to inspect. It identifies article genre and presents observable signals about sources, transparency, and the text itself.

- Criteria matched to the type of article; local analysis in English and Chinese.
- Downloadable HTML summaries for reviewing the analysis.

View Evidence Lens on Chrome Web Store

Smart Restaurant Finder

A browser prototype for comparing restaurant options and value. It uses simulated restaurant data and explores an interface built with HTML, CSS, and JavaScript.

01 / INDEPENDENT SOFTWARE

Visual Math for Obsidian

Independent developer | Public beta 0.8.2 | October 2026

I developed an Obsidian desktop plugin that helps students and other note-takers write mathematical and scientific notation directly in their notes.

Visual Math 0.8.2 in Obsidian - Visual editor, before insertion.

- Visual, LaTeX, and Hybrid editing; inline and display equations can be saved and reopened.
- Local graphing and numerical calculus, with chemistry notation, physics tools, and unit conversions.
- English, Simplified Chinese, and Spanish interfaces; works locally without a runtime account.

Desktop only. Graphing and calculus use numerical approximations within supported domains.

02 / HONORS UNDERGRADUATE RESEARCH

Economics research, presented.

ECONH 2301 | Professor Shuang Xu

2026 GCIC Fall Undergraduate
Research Conference

Money is the Cattle's Feed: A Regression Analysis of Macroeconomic Factors Influencing U.S. Cattle Export Markets

Presented October 23, 2026 | HCC Northeast Campus, Codwell Hall

The research question

How are macroeconomic conditions and production costs associated with U.S. beef export prices, and what changes when a production lag is considered?

Method & communication

The presentation uses multiple linear regression and monthly economic data from 2010 to 2020. It compares current-month variables with a model using a four-month corn-price lag, and explains the model choices and their limits to a conference audience.

This work brings together economic research, interpretation of statistical evidence, and public speaking. The models examine associations with export prices; they do not establish causation or changes in export volume.

Related honors paper: The Impact of Macroeconomic Factors and Production Lags on the U.S. Beef Export Market (2010-2020). The linked paper is the earlier written study; the conference presentation is a later revision.

02 / HONORS UNDERGRADUATE RESEARCH

Contributors Not Mercenaries: The Accomplishments of the Hessians

HISTH 1301 | Dr. Alice Ferron-Gabriele | December 2025

The research question

What do Hessian journals and memoirs reveal about lives and contributions beyond military service?

Reading the sources

This paper examines five primary-source works - journals, travel accounts, and memoirs from the American Revolution and its aftermath. Close reading, source criticism, comparison across authors, and thematic grouping help place individual accounts in a wider group history.

Scientific observation

Observations of the natural and social world beyond military duties.

Religious life

Participation in religious activity and relationships with local communities.

Community connections

Craftsmanship and social relationships obscured by a simple mercenary stereotype.

The analysis considers how authors' different social positions shape the surviving record. It argues that the familiar mercenary image leaves out important aspects of Hessian experience.

Scope & next steps: these are historical interpretations of selected sources. Wider regional comparisons, along with marriage, property, court, and military records, would help extend the research.

02 / HONORS UNDERGRADUATE RESEARCH

Music: The Magnifying Glass of Emotions in Drama

DRAMH 1310 | Professor Jill Brumer | November 2025

The research question

How do rhythm, harmony, recurring themes, and sound shape an audience's understanding of emotion, character, and dramatic meaning?

Five works, examined together

Schubert's Erlkönig; The Marriage of Figaro; Matilda the Musical; The Phantom of the Opera; and The Glass Menagerie.

The paper uses comparative close analysis, with rhetorical concepts including pathos and ethos and support from theatre and rhetoric scholarship. It examines music as a guide to tension, character, satire, memory, and narrative change.

Music as dramatic interpretation

- Rhythm and harmony can intensify feeling and prepare audiences for shifts in the story.
- Recurring themes and sound can establish character, tension, satire, and memory.
- Live performance can make music part of a shared emotional experience.

Scope: the paper offers comparative interpretation. It does not experimentally measure audience responses or describe my participation in the productions discussed.

03 / LEADERSHIP & COMMUNICATION

Learning with people.

Timberwolf Leaders Showcase

With the campus team

Timberwolf Leader

Specialist III | LSC-Tomball | September 2025 - October 2026

My work in Student Experience and Transitions included helping students navigate campus resources and providing front-desk support in Career and Transfer Connections. I also contributed to photography, interviews, website updates, and promotional videos.

Working with College Relations gave me experience with event photography and participant interviews, along with exposure to The Call, LSC-Tomball's magazine.

Public speaking

At the Timberwolf Leaders Showcase, I shared my background, work, and goals. Presenting to an audience helped me build confidence and communicate my experiences more clearly.

03 / CAMPUS SPIRIT & SERVICE

Creating a welcome.

Timberwolf alongside fellow mascots

Commencement appearance

Campus mascot volunteer | 2026

Mascot activities gave me experience engaging with different audiences, working at campus events, and helping create a welcoming atmosphere.

- LSC-Magnolia Center grand opening
- Tomball Open House
- Commencement

The photo collection also documents interactions with fellow mascots, including the University Park mascot, and moments around a campus photo session.

03 / CREATIVE COMMUNICATION

Campus stories, on screen.

Leadership Decoded

5 Minutes with Timberwolf Leaders | Co-editor

A video project from my Timberwolf Leader experience. My contribution was co-editing the finished campus story.

Watch Leadership Decoded

CTC: A Year in Action

Campus film | Creator

A second campus communication project, bringing moments from Career and Transfer Connections into a film.

04 / AUDIENCE & CONTENT STRATEGY

From views to decisions.

Curiously Brief | Independent channel project | October 2026

I use audience data and competitive research to guide decisions for my English-language knowledge channel. Working with AI tools, I turn channel reports and content comparisons into a structured improvement plan.

21	100	19
Published videos audited	Relevant channels benchmarked	Selected detailed media cases

Three connected areas of analysis

Channel performance	Compared videos at the same publication age and reviewed engaged views, average viewing duration and percentage, and subscriber conversion.
Content-market research	Built a searchable benchmark of related channels, representative videos, topics, titles, and formats to support content and production choices.
Traffic & measurement	Examined discovery sources, kept paid-promotion attribution separate in interpretation, and documented missing data and mismatched reporting windows.

Outputs include a video audit, competitor database, selected media case studies, and prioritized follow-up measurements. The benchmark is a selected comparison set; findings remain exploratory where the data is incomplete.

05 / SCHOLARSHIPS & ACADEMIC COMMUNITIES

Recognition & opportunity.

Photo with Matthew Glynn of KPMG US

2026 JLL Award certificate

2026 BAFTX JLL Award

British American Foundation of Texas | Scholarship recipient

Honors College Scholarships

Lone Star College | Recipient in 2025 and 2026

Experience Extraordinary Retention Scholarship

LSC-Tomball | Awarded for the 2024-2025 academic year

President's List

2025 | Recognized February 2026

ACADEMIC COMMUNITIES & PROGRAMS

Global Scholar - Honors Undergraduate Research Track; accepted Fall 2025. Phi Theta Kappa - member since 2025. LSC-Rice Take Flight - program participant, 2025-2026.

View scholarship photographs and recognition

06 / TOOLS & SKILLS IN PRACTICE

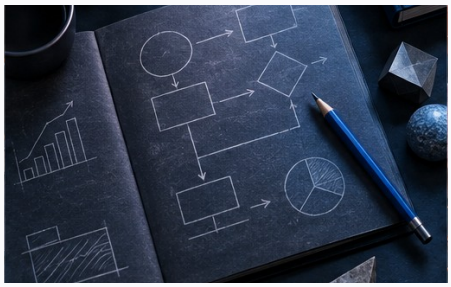

Learning through doing.

Formal learning alongside skills developed through research, software, channel analysis, and campus projects.

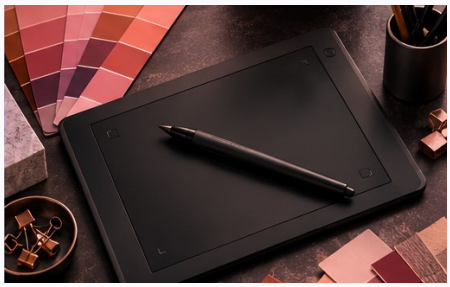

Google Analytics (GA4)

Digital measurement; training completed in 2025.

Business & Audience Analysis

Audience metrics, traffic sources, and competitor benchmarking.

Canva & Visual Communication

Visual design, campus communication, and event photography.

Cloud Foundations

AWS exam-preparation coursework in concepts, security, and pricing.

Video Editing & Storytelling

Campus films and an independent knowledge channel.

Research & Communication

Honors research, regression interpretation, and conference speaking.

Thematic illustrations represent learning areas; they are not screenshots of my project output.

Selected credential - historical record

Google Analytics (GA4): earned May 2, 2025; credential expired May 2, 2026.

07 / A LITTLE MORE ABOUT ME

Beyond the coursework.

A brief personal introduction, and ways to explore my work or get in touch.

Personal interests

I enjoy music, cycling, photography, exploring food, and visiting art galleries and museums. I'm especially interested in classical music and its background, and I have studied piano in the past.
